Launching of AI and ML Certificate Course in SBRR Mahajana Degree College

Mysore, Feb. 3 – After realizing growing demand for AI and ML and its significance in the coming future, SBRR Mahajana First Grade College is Introducing and has announced Certificate courses with specializations in Artificial Intelligence (AI) and Machine Learning (ML) from this academic cycle 2020, specially designed for working professionals and open to all students. The decision to introduce

Certificate Course in AI and ML was taken during its executive council where the body observed that the new course will be made available to all the students from the academic year 2020 said Sri. T. Muralidhar Bhagavat, President, Mahajana Education Society.

Sri. T. Muralidhar Bhagavat, President, Mahajanas Education Society, launching the AI and ML Certificate course by lightening lamp along with the other dignitaries on the dais.

Dr. C. N. Ravikumar, Former Dean (Academics), Professor and HoD, Department of Computer Science and Engineering, SJCE and Mentor, AI and ML course, Mahajana First Grade College in his Inaugural address said the new course is a platform to introduce an 'AI for everyone' even for non-technical streams to navigate the rise of artificial intelligence (AI) and Machine Learning. The future will be built on Artificial Intelligence and Machine Learning. The programme focuses on building skills that will enable professionals for a rewarding career in this high-growth domain.

He opined that the programme is designed for technology professionals who wish to advance their career as a specialist in the field of Artificial Intelligence and Machine Learning. He called upon the students who wish to offer the roles such as Data Scientist, Machine Learning Engineer, AI Product Manager, Data Engineer, and Applied ML Scientist should consider applying to this programme.

Sri. B. G. Mohan Krishna, Former Senior Lead Principal Education and Research, Infosys, Mysore & Faculty, AI and ML, Mahajana College in his keynote address said that there is an increasing need for intelligent and accurate decision-making across industries. This has led to an exponential growth in the adoption of AI and ML technologies, and they are expected to remain relevant in years to come. This course comprises modules and projects, these modules have been carefully designed to cover Mathematical and algorithmic foundations, AI fundamentals and several modules on statistical and ML methods.

He added, that Artificial Intelligence (AI) made headlines recently when people started reporting that Alexa's unexpected laughing notwithstanding. But AI has been a sound career choice for a while now because of the growing adoption of the technology across industries and the need for trained professionals to do the jobs created by this growth. Moreover, AI offers many unique and viable career opportunities. AI is used in almost every industry, yet we have a massive need for qualified, skilled professionals.

He opined that AI is how we make intelligent machines. It's software that learns similar to how humans learn, mimicking human learning so it can take over some of our jobs for us and do other jobs better and faster than we humans ever could. Machine Learning, algorithms uses a set of training data to enable computers to learn to do something they are not programmed to do. Machine learning provides us with technology to augment our human capabilities.

He also pointed out that AI has widespread benefits. Both people and companies benefit from AI. Consumers use AI daily to find their destinations using navigation and ride-sharing apps, as smart home devices or personal assistants, or for streaming services. Businesses can use AI to assess risk and define the opportunity, cut costs, and boost research and innovation.

Sri. K. R. Ravi, Former Technology Lead Education and Research Infosys, Mysore and Faculty, AI and ML, Mahajana First Grade College, in his closing remarks said that “As per the statistical report around 22,000 fresher’s were added to analytics workforce in India; Hiring for fresher’s has increased by 37% and citing an example of 344% increase in job postings in the last few years. Talking about the development he said, “AI is the need of the hour, most industries are looking for graduates who have some knowledge of AI. Job seekers with AI degrees are well paid and in high demand.”

Sri. T. Muralidhar Bhagavat, President, Mahajana Education society in his presidential address said with artificial intelligence (AI), the speed, accuracy, and effectiveness of human efforts are enhanced. But the role of the human is still hugely important, particularly in customizing AI solutions to benefit business operations. This is especially apparent when it comes to safeguarding the fun and creative roles humans have in matchmaking machines with the tasks at hand.

He called upon the students to enrich their knowledge to match future advanced technical knowledge, and artificial intelligence program empowers you with the ability to and can be used as a true competitive advantage. Mahajana College is providing great platform for beginners, who take great interest in the role of artificial intelligence in shaping up their career.

Dr. S. Venkataramu, Principal, SBRR Mahajana First Grade College, in his Principal’s Remarks said that introducing certificate course in AI and ML programmes is first step towards the development of skill based subject, which help you learn various aspects of Artificial Intelligence and Machine Learning and is aimed at strengthening talent pool in Mysore. He noted that the potential for AI to improve the quality of human lives is tremendous. This program will train students in the fundamentals of computer science, AI and ML, in addition to sensitizing them to the ethical issues in deploying AI-based solutions. He called upon the students to pursue this course which is having great opportunity for the cooperate executives and managers to level up their knowledge and skills. The teachings of the programme will enable learners in adopting advanced techniques and systems which might further help in achieving their goals.

Dr. S. Ramesh, Chief Executive Officer and Academic Advisor of SBRR Mahajana First Grade College spoke about learn to writing programs using the foundational AI algorithms powering everything, “AI enables students to discover a unique path of learning, builds a solid foundation by covering the most popular and widely used deep learning technologies and its applications, including Networks, Natural Language Processing etc. which builds confidence in their ability. “Like any evolving technology, there exists a gap between the promise, hype, capability and practical reality of AI. What widens this gap is the lack of resources to easily develop an intuitive insight on topics such as AI at an early stage. The motivation behind Mahajana First Grade College is to help the students learn the practical aspects of a complex topic like AI and ML in a friendly and simple manner,” he said.

Invocation by Kum. Pranamy Bhat, Smt. Shruthy Poonacha welcomed the dignitaries, Sri. Manjunath KS, Convenor, AI and ML Course, MFGC introduced the guests. Sri. Radhesh A., Asst. Professor, Dept. of Computer Science proposed vote of thanks. Smt. Radhika Rani Compeered the programme. Students and Teaching staff from all the Department participated in the inaugural programme.
